Range of Recommended Ages

Catch-Up Immunization

Certain High-Risk Groups

This schedule indicates the recommended ages for routine administration of currently licensed childhood vaccines, as of February 9, 2012, for children through age 18 years. ADVANTAGE Health Solutions, Inc. adopts the most current immunization schedule approved by the Advisory Committee on Immunization Practices (ACIP) and the American Academy of Pediatrics (AAP). Additional vaccines may be licensed and recommended during the year.
